

Intense Peptide Skin Recovery Complex

A multi-tasking product that reduces wrinkles and inflammation, moisturizes skin and helps rebuild the lipid barrier.

Product Line: **Age Management Skin Care System**

Size: **1.0 fl. oz. US | 30 mL**

Item Number: **GM83**

Protocol: **O2 Treat**

Age Management Skin Care System

GlyMed Plus Age Management Skin Care System addresses the individual challenges of chronologically injured, photo-aged, and environmentally damaged skin. This system is a complete line of products that gently cleanse, actively treat, restore balance, and protect all skin types for cellular rehabilitation.

Description

Intense Peptide Skin Recovery Complex delivers four potent amino acid complexes clinically proven to target lines and wrinkles deep within the skin's infrastructure. These micro protein fragments are cellular building blocks to promote the regeneration of collagen for skin firmness and elasticity

This product is recommended for

Individuals wanting to reduce and prevent fine lines, wrinkles, and aging skin.

Directions

After cleansing with a GlyMed Plus cleanser, apply any appropriate serums. Follow by massaging cream gently onto face and neck morning and evening, concentrating on line prone areas.

Key Ingredients

Palmitoyl Tetrapeptide-7:

A regenerating peptide comprised of four amino acids to suppress the chemical messengers which trigger the body's acute inflammatory response which lead to accelerated aging.

Ceramide 2:

Plays a key role in the establishment of the stratum corneum barrier function, preventing TEWL (Trans Epidermal Water Loss) and increasing moisture levels.

Acetyl Hexapeptide-8:

Amino peptide developed specifically to reduce wrinkles and the signs of premature aging. It is a longer chain molecule of Acetyl Hexapeptide-3 and works in the same manner.

INGREDIENTS: Water (aqua), C12-15 Alkyl Benzoate, Caprylic/Capric Triglyceride, Acetyl Hexapeptide-8, Glycerin, Cyclomethicone, Lavendula Angustifolia (Lavender) Extract, Glyceryl Stearate, PEG-100 Stearate, Palmitoyl Oligopeptide, Palmitoyl Tetrapeptide-7, Palmitoyl Oligopeptide, Dipalmitoyl Hydroxyproline, Arctostaphylos Uva-Ursi Leaf (Bearberry) Extract, Sea Whip Extract, Centella Asiatica Extract, Echinacea Purpurea Extract, Glycyrrhiza Glabra (Licorice) Root Extract, Camellia Sinensis (Green Tea) Leaf Extract, Phyllanthus Emblica Fruit Extract, Hypnea Musciformis Extract, Gellidiela Acerosa Extract, Sargassum Filipendula Extract, Theobroma Cacao (Cocoa) Seed Butter, Butyrospermum Parkii (Shea) Butter, Prunus Amygdalus Dulcis (Sweet Almond) Oil, Corylus Avellana (Hazel) Seed Oil, Tocopheryl Acetate, Retinyl Palmitate, Tetrahexyldecyl Ascorbate, Tribehenin, Sorbitol, Xanthan Gum, Ceramide 2, PEG-10 Rapeseed Sterol, Stearic Acid, BHT, Magnesium Ascorbyl Phosphate, Polysorbate 20, Polyacrylamide, C13-14 Isoparaffin, Laureth-7, Lavendula Angustifolia (Lavender) Oil, Dimethicone, Butylene Glycol, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Carbomer, Tetrasodium EDTA, Phenoxyethanol, Ethylhexylglycerin, Triethanolamine

Frequently Asked Questions

What are peptides and how can they benefit my aging skin?

Peptides are amino acid chains that are also referred to as cellular communicators. They have the ability to initiate cellular activity to create some type of response. Peptides are classified in several groups including anti-inflammatories, collagen stimulators, neuro peptides, bio-active peptides, and more. Peptide science is very fast paced and new technology continues to find ways to utilize them in a variety of skin functions. Intense Peptide Skin Recovery Complex contains a variety of different peptides.

Do I need to add a moisturizer on top of my Intense Peptide Skin Recovery Complex?

This product contains many great ingredients that add both age management benefits as well as moisturizers. Most individuals find this to be a great “multi-tasker” for softening lines and wrinkles and daily moisturizing.

If this product is for refining skin and correcting aging concerns, why did my Aesthetician recommend it for my Rosacea?

As you have learned from your skin care professional, Rosacea is an inflammation of the skin that is progressive and has the potential to become permanent. Intense Peptide Skin Recovery Complex contains an ingredient (sea whip extract) that is a more powerful anti-inflammatory than hydrocortisone and without the side effects.
